

# Japan Material Flow Institute (JMFI)

**Aiming for Total Optimization of Supply Chain / Logistics & Material Flow,**

**JMFI Will Be a Collaborative Platform of Research, Education and Enlightenment.**

In our modern society, supply chain from production to consumption, such as procurement, manufacture, distribution, and sales of products is expanding its momentum.

How will you evolve a supply chain / logistics system deployed there?  
There is no doubt that it will affect the competitiveness of the company.

But there are various challenges.

- How can we build sustainable logistics?
- How can we realize seamless movement of things?
- How can we collaborate while using IT technology and the power of logistics industry etc?

In other words, supply chain /logistics needs innovation and collaboration.

To realize this, it is necessary to gather wisdom from a wide range of parties involved in the supply chain.

To promote such activities, JMFI was founded.

JMFI puts research and education at the center of activities and publicizes the results.

-----  
"Research"  
-----

10 research teams conducts dynamic activities by people who are cutting-edge problem consciousness in a wide range of industrial fields and seeking solutions. We aim to become a center with good footwork to tackle cutting-edge topics more and more.

And we would like to communicate such problem consciousness to the administration, to participate in the research, or to propose activities that we utilize it.

-----  
"Education"  
-----

At the same time, we will conduct various human resource development activities including seminars / lectures for various themes including "Logistics Assessment Course".as a certified course of JAVADA.

-----  
"Enlightenment"  
-----

We will also hold activities such as "Asia Seamless Logistics Forum" , PR and educational activities. Furthermore, we would like to aim for collaboration with overseas organizations according to the spread of global networks.
